

BUGS IN THE RAIN

In the tiny and frantic world of insects, a torrential rain unleashes chaos. The bugs run and push desperately in a chaotic stampede to save themselves, but not all of them succeed.

Compete to save the greatest number of possible bugs before the storm catches up!

Each player chooses a deck of bugs, shuffles it, and takes the first three cards to form their hand.

Set up the shelter cards on the table. Some have greater capacity for insects and other special abilities.

The shelters will be safe as long as the bug that wants to occupy their spot doesn't come. And since they have a limited capacity, you will occasionally be left out and exposed to the rain.

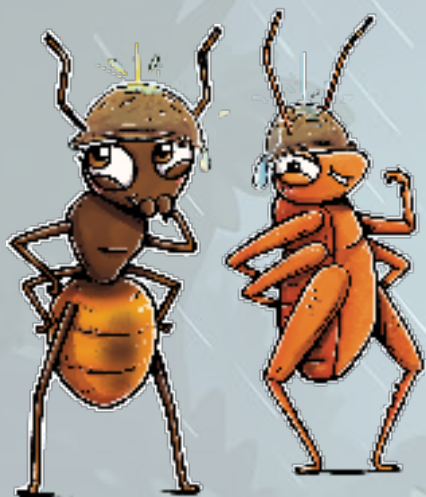

A good helmet can protect you!

Decide wisely if you push left or right, you might cause a chain movement.

Finally, once your deck is finished, whoever managed to resist with the most bug cards in the shelters will be the winner of the game.

KEY POINTS

- Family Game
- Quick turns
- Very easy to play
