

QUILLÉN

The sclerophyllous forest is a unique ecosystem in the central zone of Chile, formed by hard-leaved plants capable of resisting dry summers and rainy winters. This biome harbors a high biodiversity of flora, fauna, and fungi, many of them endemic, and fulfills essential functions such as protecting the soil, regulating water, and maintaining environmental balance. In Quillén we explore these ecological interactions, the role of water as a vital thread, and the impact of human decisions on nature. Players must balance the use of the ecosystem with its conservation.

Core Mechanics

1. Deck-building: Each player starts with an initial deck of 10 cards. When buying Restoration Cards, they replace old cards and upgrade actions.

Starting Cards.

Level 1 Cards

Level 2 Cards

Objective Cards, Victory Points

2. Dice Management: The dice are the game's resources and represent different elements of the ecosystem: plants, animals, water, and human actions. Players roll, set aside, reroll, or spend them to perform actions, buy cards, or obtain Victory Point cards.

Human Actions

End of the Game and Scoring

The game ends at the conclusion of the round in which a player reaches . The total VP of all players is compared.

In case of a tie, the player with the most Restoration II Cards wins. If the tie persists, the player with the most Restoration I Cards wins.

If it still continues, the victory is shared.

Game Objective

Become the best conservationist, accumulating the highest quantity of Victory Points (VP) through scoring cards and ecological upgrades in the deck.

KEY POINTS

- ✓ Family game
- ✓ Quick turns
- ✓ High replayability
- ✓ Scientific rigor
- ✓ Flexible gameplay
- ✓ Solo Mode

Suggested MSRP: USD \$50

COMPONENTS

Cards

- 12 Trophy Cards
- 6 Resource Cards
- 4 Player Cards

Punchboard Tokens

- 100 Flower/Seed Tokens
- 28 Water/Sun Tokens
